16th World Trade Union Congress, 6-9 April 2011, Athens, Greece
Proposals of the FTE of MEXICO

35. International proletarian solidarity

ABSTRACT: The practice of international proletarian solidarity is a duty of the workers of the world. This practice must be expressed with force and conviction.

1. Introduction

The solidarity of the workers, and the common action of such, is two important tasks to promote the unit. This, as well, constitutes a way to take ahead our program of class.

2. To unite forces with class policy

Proletarian solidarity has several dimensions and the policy is fundamental.

The practice of solidarity is one of the great political tasks of our time. Our solidarity does not have to be limited the interim or trade union actions, not even to its economic forms, but to cover the ample social and political, national and international range.

3. Conclusions

In the world there are many political conflicts, including the war, social and labor. The workers and people of the world struggle in an unequal battle and need the strong support of class.

PROPOSALS

The FTE of Mexico presents to the 16th World Trade Union Congress the following proposals:

1. The WFTU expresses its solidarity of class with the workers and people of the world in fight, in defense of the natural resources, and the social and labor rights.
2. The WFTU is pronounced against the imperialistic wars of aggression anywhere in the world.
3. The WFTU expresses its resolute opposition to the manufacture, possession and use of, the chemical, biological and environmental nuclear weapons; and it demands its definitive and total elimination, of the planet and outer space.
